

KEVIN RODRIGUES

Boston, MA (Open for relocation) | (617) 792-6609 | rodrigues.k@northeastern.edu | [LinkedIn](#)

Available - June 2025 onwards

EDUCATION

Northeastern University, Boston, MA

May 2025

Master of Science in Software Engineering Systems

Coursework - Object Oriented Design, Enterprise Software Design, Database Management, Web Design, Algorithms, Design Patterns

Mumbai University, Mumbai, India

Aug 2016 - Oct 2020

Bachelor of Engineering in Computer Engineering

TECHNICAL SKILLS

Programming:	Java, J2EE, JavaScript, SQL, C#, HTML, Python, Linux, Data Structures, XML
Frameworks:	Hibernate, Spring Boot, Angular, React, REST API, Microservices, JDBC, JUnit, Selenium
Database:	MySQL, PostgreSQL, Oracle, DB2, SQL Developer, Aqua Data Studio, SQL Server Management Studio
Cloud Computing:	AWS (S3, EC2, CloudWatch)
Tools:	Eclipse, JIRA, Maven, Service Now, Unix, Git, Bitbucket, Gitbash, Visual Studio Code, Postman
Certifications:	Oracle Certified Java Associate (OCJA)

PROFESSIONAL EXPERIENCE

Graduate Teaching Assistant, Northeastern University | Boston, USA

Sept 2024 - May 2025

- Assisted **Prof. Chen Hsiang Yu** in Object Oriented Design in **Java** course for **170+ students** by performing duties like resolving student doubts, conducting meetings, supporting student learning, grading assignments, and setting mid-term, final exam papers.

Backend Engineer, Experian | Mumbai, India

Feb 2023 - Aug 2023

- Wrote **database scripts** in relational databases like **Oracle, MySQL, DB2** for efficient data extraction boosting client request fulfillment
- Developed **REST APIs** using **Spring Boot** and **Java** with **12 endpoints** for credit reports module, reducing response time by **25%**
- Wrote optimized **SQL joins** and **Subqueries**, reducing **API response time** by **35%** and significantly improving system performance
- Committed code periodically on **GitHub** and raised **Pull Requests** on **Bitbucket**, and utilized **Git** for version control and development
- Performed unit testing using **JUnit** and **Mockito**, and **API endpoint** testing using **Postman**, resulting in **20%** reduction in system errors

Software Engineer (Consultant), Larsen and Toubro Infotech (LTI) | Mumbai, India

Aug 2020 - Nov 2022

- Automated **migration** of manual **jar** file execution to a UI built with **React** and **Spring Boot**, reducing repetitive tasks efforts by **40%**
- Supervised** a team of 4 in **designing APIs, system architecture**, and **technical design** document for reports module of the application
- Improved website performance of dashboard by implementing **lazy loading** of images using **JavaScript**, reducing load time by **35%**
- Integrated **Apache Kafka** and **SWIFT** messages with **Citi Bank Application** to implement **MQTT** protocol in financial services
- Optimized **microservices** and **REST APIs** using **Java** and **Spring Boot**, web pages using **Angular** and **ReactJS** improving **25%** efficiency
- Implemented **CI/CD** pipelines with **Jenkins** and **Git**, automating **microservices deployment** and reducing time by **30%**
- Led **Selenium** based **automation** testing, conducted **Unit, Integration** and **Regression** tests, decreasing manual testing errors by **18%**
- Followed **Scrum** and **Agile** model practices in **SDLC**, engaged with Analyst's and used **JIRA** for tracking **user stories** and **sprints**

PROJECTS

IPL Sports Application | Northeastern University, Boston

Feb 2024 - April 2024

- Built a RESTful web app using **Maven, Spring MVC, Java Persistence API** and **Hibernate** to manage matches of a cricket tournament
- Optimized data handling with **Spring Data JPA**, achieving a **30%** faster response time, critical for application's operational efficiency
- Enforced **referential integrity** in **MySQL database** to prevent deletion of teams with associated players/matches

Google Product Inventory | Northeastern University, Boston

March 2025 - April 2025

- Developed an inventory management system using **Java** and **Spring Boot**, applying multiple **design patterns** for scalability
- Implemented **Facade** and **Command** patterns to generate transaction **PDFs** and send **notifications** to the users
- Utilized **Singleton** pattern to ensure efficient instantiation of model objects and prevent resource redundancy
